DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1- 6 are drawn to a ball collecting apparatus, classified in class 473, subclass 505.
- II Claims 6 - 12 are drawn to a method of using a ball collecting apparatus, classified in class 473, subclass 510.

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the apparatus could be used to collect loose balls on the ground.

Note: that if applicant elects the product and the product is subsequently held allowable, then the method will be rejoined if the same structure is added to the method claim i.e. adding the step of utilizing the apparatus of claim 1 .

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to P. Loffer on 5/21/2004 to request an election to the above restriction requirement with a voice mail message to respond if the applicant wished to discuss the restriction. At the time of this action,

Art Unit: 3711

applicant's representative has not returned the examiner's phone message which resulted in this action being mailed.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
